

# **Mountain Equipment Sleeping Bags**

## **Extreme Range**

For the coldest places on earth, take it to the extreme with the finest range of bags on the mountain. High quality 93% down at 700+ fill power and the patented EXL system hug the heat to your body, while a contoured hood and lightweight Drilite Loft fabric offer complete protection from the elements.

## **Dreamcatcher TDS Range**

For award-winning comfort, trust Dreamcatcher's unique combination of pure down insulation and our patented Thermo-Dynamic System to hold the heat close to your body, whilst still allowing total freedom of movement. Catch a great night's sleep whatever the conditions.

## **Classic Range**

We don't all go to extremes on the mountain, so if classic comfort's your bag then this long established range fits the bill. Soft pure 90% down at 600 + fill power gives durable protection from the elements to -20°C.

## **Moonwalker Delta Range**

Get a heavenly night's sleep in alien terrain. The unique Polarguard Delta insulation in these bags combines with our patented EXL system and a Drilite Loft outer shell to give superb protection in all weathers, including the wet.

## **Sleepwalker TDS Range**

A revolution in sleeping comfort, these award-winning bags employ our unique Thermo-Dynamic System to ensure warmth and space, giving you the room to move whilst still eliminating cold spots.

## **Firewalker Range**

The heat is on! Exceptional value for money, these award-winning bags won't burn a hole in your pocket. Anatomically contoured hoods combine with "Shingle Construction" Polarloft insulation to ensure great warmth and comfort.

## **Special Application Range**

Designed with expert feedback from our military customers, these bags are an upgraded version of our Sleepwalker range. With a waterproof foot liner, extra large fit and the Thermo-Dynamic System ensuring total freedom of movement, these bags will see significant professional use around the world this year.
